TECHNOLOGY IN ACTION

Google Docs on Your iPad

You can access your [Google docs](#) on your iPad. If you go to [Google Docs](#) via Safari, you'll find all the documents shared with you co-mingled with your own documents. If you want to see the same set-up and features as on your computer, download the free [Google Drive](#) app.

Deleting Credit Card Info from iTunes

Although inputting your credit card information in your iTunes account makes it easier for you to buy music, movies and apps from the iTunes store, it's not necessary to do so. If you had put in credit card information and would like to get rid of it, it's easier to do than you might anticipate.

[Open iTunes on your computer.](#) [Log in to your account.](#) [Go to "View My Apple ID."](#) You may have to enter your password again.

[In the Apple ID Summary, click on the "Edit" link directly to the right of Payment Type.](#) This

[allows you to edit your choice of payment.](#)

[Instead of choosing a credit card, click the "None" button.](#) [Scroll down and chose "Done" from the bottom choices.](#)

Now you can change the information in your Apple ID to suit your needs. Doing this will take care of iTunes and the App store.

Deleting Browser History

If you would like to make sure that your user information is not available on the computer you've been using, you can easily remedy this by **deleting** your **browser history**.

To delete your history in Firefox, go to History>Clear Recent History. Click on Clear Recent History and allow your computer time to do this.

In Safari, go to History>Clear History. It is at the bottom of the History list and you may need to scroll down to find it. Allow time for your computer to delete your history.

In Chrome, click the Chrome Menu on the end of the browser toolbar. Go to Tools>Clear browsing data. Select the amount of data to clear or "beginning of time" to clear all. Click on Clear browsing data.
