## TECHNOLOGY IN ACTION

### Making Apps Work

To make your Pinterest or Pandora apps work on your iPad, the NJSP network needs to know who is trying to access those sites.

To authenticate, go to Pinterest or Pandora in Safari. You will encounter the blue override page. Enter your laptop login and password. Be sure to change local user to ODM on the pull-down menu. This will open Pinterest, Pandora or any other blocked site. Quit Safari and try your app. Now that you've authenticated, it should work!

### Redeeming App Key Codes

It's easy to redeem your app key codes at your iPad App Store. Just follow these simple instructions.

1. Open your App Store app.
2. On the bottom of the screen touch the "Featured" button.

3. Swipe the screen up to move to the bottom of the featured apps. At the bottom, you will see three buttons.

The middle one is the "redeem" button.

4. Tap the "Redeem" button.
5. Tap the line that says "You can also enter your code manually."

6. When the keyboard pops up, double tap the Shift arrow to put on the caps lock.

7. Type in the key code.

You will receive a message that says the code has been successfully redeemed.

## Simple iPad Tips

**Creating Folders:** You can [create folders](#) that allow you to easily organize your iPad and separate apps into different categories. The neat part is the iPad will create a default [folder](#) name that is often a pretty good description of the apps it contains. To create a folder, simply hold your finger down on an app's icon until all of the apps begin to shake. Next, just drag it on top of another app; the iPad will create a [folder](#) containing the apps. To add more apps to the [folder](#), simply drag them over and drop them on the newly-created [folder](#).

**Clearing Space:** Your iPad does not have unlimited [space](#). Some of the games that are downloaded take up a great deal of room; retaining all your photos can also take up [space](#). When you decide that you no longer want a certain app on your iPad, email Mrs. Akers for an appointment to clear those unwanted apps. You can store your photos in your limited iCloud space, sync your photos to your laptop, or email your photos to yourself. Ultimately, the best place to store photos is on a separate drive. Keep an eye on how much space is being used!

## FREE WEATHER APPS

### Free Digital Temperature

Know the temperature wherever you are by looking at this quick and simple digital temperature app. *Free Digital Temperature* determines the temperature via GPS. Celsius and Fahrenheit supported, you can refresh at any time for the latest data.

### Temperature Convert

*Temperature Convert* is a powerful yet simple tool for converting temperatures from fahrenheit to celsius or celsius to fahrenheit. It also has support for Kelvin so you can convert kelvin to celsius or fahrenheit or vise-versa.

Also included is a decimal and negative point, so you can convert decimal temperatures and negative (below 0) temperatures.

### WGN TV Chicago Weather Center

When in doubt, Chicago turns to WGN-TV chief meteorologist Tom Skilling and his team to understand the weather. With the *Chicago Weather Center* app, you will have the latest forecasts and reports on current conditions from Chicago's superman of meteorology with you wherever you go.

This app contains many color maps and features like the highly accurate ten-day forecasts with daily and hourly detail.
